The biology minor adds a biological science focus to a student's program of study that can be tailored to their interest in life science. It requires completion of at least 15 credits of coursework, 9 of which must count only for the minor. Students must also earn a "C" or higher in 6 credits at the 300+ level. **The following courses are required of all students wishing to complete a biology minor: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L (8 credits).** Seven additional 300+ level credits should be selected from the following list to complete the minor:
