

Biology Degree Requirements

2013-14 Iowa State University Catalog

www.biology.iastate.edu

Information in this document is subject to change. See your advisor or the Student Services Office (103 Bessey) for the most current version.

- Biology majors are required to complete 120 credits to graduate.
- A minimum of 32 ISU credits are required to graduate from ISU.
- The final 32 credits must be taken at ISU or approved by the college.
- Students must have a 2.0 minimum GPA to graduate and be in good standing at the university.
- Students are ultimately responsible for all issues concerning the satisfactory completion of degree requirements.
- Courses taken at other institutions may be equivalent to ISU courses or may be substituted to fulfill requirements.
- Many professions require specific courses, investigate specific schools of interest for admission requirements.
- Students are encouraged to take advantage of opportunities available in undergraduate research, internships, field trip courses, seminars, summer field study and study abroad.

University Requirements:

ENGL 150 *Minimum grade of C	3 credits
ENGL 250 *Minimum grade of C	3 credits
LIB 160	1 credits
U.S. Diversity	3 credits
International Perspective	3 credits

International Perspective and US Diversity courses may also apply to Humanity or Social Science requirements. Lists are available at <http://www.public.iastate.edu/~registrar/courses/div-ip-guide.html>

College Requirements:

Students may major in Biology through the College of Liberal Arts & Sciences or the College of Agriculture & Life Sciences. The LAS College also requires 45 credits of 300+ level course work from a 4 year college.

	<u>LAS requirement</u>	<u>AgLS requirement</u>
Foreign Language	4-8 cr or 3 years H.S.	---
Communication *Minimum grade of C	ENGL 302-316 or SP CM 212	SP CM 212
Math *Met by Biology Requirements	Math and/or Statistics	Math and Statistics
Science *Met by Biology Requirements	Natural Sciences	Biological and Physical Sciences
Arts and Humanities	12 credits	3 credits
Social Sciences	9 credits	3 credits
Ethics	---	3 credits

Biology Major Requirements:

Students must have a minimum 2.0 GPA in the major (Biology Core + Biology Advanced Coursework) with all grades C- or above. Transfer students (both from other universities and from other majors at ISU) are required to complete Biol 112 and Biol 111. New freshmen students are required to complete Biol 110 and Biol 111. A typical 4 year plan is available on the Biology Program web site.

Biology Core:

BIOL 110 (or 112 R cr for transfers)	Introduction to the Biology Major	1 credit (Rcr)
BIOL 111	Opportunities in Biology	.5 credit
BIOL 211 and 211L	Principles of Biology I	4 credits
BIOL 212 and 212L	Principles of Biology II	4 credits
BIOL 312	Ecology	4 credits
BIOL 313 and 313L	Principles of Genetics	4 credits
BIOL 314	Principles of Molecular Cell Biology	3 credits
BIOL 315	Biological Evolution	3 credits

Biology Advanced Coursework:

Select 21 credits worth of coursework from approved list. (see below)

Students must also complete a minimum of 9 credits in BIOL and have credit for 2 laboratory experiences in BIOL to fulfill the advanced area requirement.

Biology Supporting Requirements:**Chemistry**

Two possible sequences:	General Chemistry	Organic Chemistry	Biochemistry
-Minimum: 12 credits	CHEM 163 and 163L	CHEM 231 and 231L	BBMB 316
- Pre-Prof/grad school: 20 credits [Chem 332&L not required for biology]	CHEM 177 and 177L; CHEM 178 and 178L	CHEM 331 and 331L [CHEM 332 and 332L]	BBMB 316 (or 404 or 420)

The minimum course requirement for Biology is one semester of general chemistry and lab, one semester of organic chemistry and lab and one semester of biochemistry. Several sub-disciplinary areas of biology can be met with the minimum, however, certain career paths may suggest or require more than the minimum. Consult an advisor for information.

Physics 5-10 cr

-General Physics I and II (Algebra-based):	PHYS 111 & 112
Or Physics for Life Sciences:	PHYS 115X & 115L

One semester of physics is required for biology. Some career paths may require a year of physics or specific physics course requirements.

Math/Statistics

Four possible sequences:	Calculus	Statistics
-Typical for LAS, Required of AgLS	MATH 160 or 165 or 181 and	STAT 101 or 104
-General Calculus only: 8 credits (LAS)	MATH 165 and 166	---
-Calculus for the Life Sciences only: 8 credits (LAS)	MATH 181 and 182	---
-Statistics only: 7-8 credits (LAS)	---	STAT 101 or 104 and 301

Students in AgLS are required to have a math and statistics course. This can be accomplished in several ways, however the Biology math/stat requirements are one calculus course and one statistics course, or year of calculus, or a year of statistics. *If two semesters of statistics are completed, an AgLS student may take any acceptable math course as outlined by the AgLS College, see Biology Office for details.*

Approved Biology Advanced Course Lists:

Semester offerings change, for specific semesters check the Schedule of Classes: <http://classes.iastate.edu/> Check 103 Bessey for most recent list.

*Students may apply a maximum of 7 credits of the following: BIOL 480, 481, 490 (2 cr max), 491(2 cr max), 494 and 499 toward advanced biology requirements.

Advanced course lists developed for specialty areas (Human Health, Animal Health, Ecology and Conservation Biology, Evolution and Biodiversity and Cell Molecular Developmental) are available online (<http://www.biology.iastate.edu/biolspecializations.html>) or in 103 Bessey.

BIOL Courses (including EEOB and GDCB Courses open to undergraduates by prerequisite or permission)

-minimum of 9 credits to be selected including 2 laboratory courses denoted by ♦ - Some EEOB and GDCB courses may also meet lab requirements
